

BIG RESULTS

in a small amount of time

Connect the dots in a 3-5 day workshop

Work with Datatonic's cloud and data science experts to extract real value from your data

 datatonic

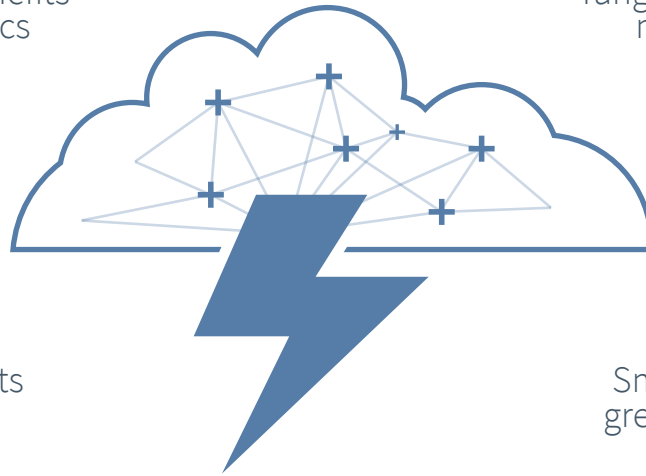

in partnership with

Google

Solve a specific business analytics challenge by joining forces with our Datatonic team in a hands-on workshop

Experience the benefits of cloud analytics

Tangible outcome in a matter of days

Distill deep insights from your data

Small investment - great ROI possibility

Workshop Approach

Beforehand

- + Define a business case to be solved
- + Prepare datasets needed
- + Datatonic assembles an expert team

At the workshop

- + Align data architecture
- + Split into teams to integrate and transform the data
- + Build data scripts and computations
- + Visualise and analyse the first results

At the end

- + Discuss the solution built in the workshop
- + Present the resulting insights
- + Outline how to go from here

“During the workshop, Datatonic assisted us in designing a new architecture for dealing with our ever expanding datasets, processing our data efficiently using the latest cloud technology, and visualizing it with powerful BI. After the workshop they developed a sales recommendation system with our IT team allowing us to become more relevant towards our customers.”

BI and Product Manager at Vente-Exclusive

About Datatonic

Datatonic are a team of data and statistics experts that help corporations drive their business through the power of analytics. Datatonic’s mission is to close the growing gap between data volumes and useful insights. Our work allows our customers to take smarter actions driven by data.
